Amp5

Sustainable charging for generations to come.

AmpSociety

## A worry-free charging experience

Amp5 is a modular, scalable, and future-proof charging system with support for native OCPP. With holistic system architecture, Amp5 delivers the most reliable charging experience on the market.

Centralized system architecture for operational reliability.

Modular design for easy & reliable installation.

- Reliable operation with redundant internet connection (LAN & 4G).
- Self-healing system with automatic recovery.
- Charges more vehicles or powers engine heaters with 1/3 phase switching.
- Supports plug & charge (ISO 15118-20) and V2G with OCPP 2.0.1.
- Lightning-fast load balancing wired locally or via cloud service.
- Integrated surge protection and emergency stop.
- Fraud protection with display & digital QR codes.
- Battery backup for alarm activation and cable unlocking during power outages.
- Firmware updates (FOTA) without interrupting charging sessions.
- Integrated LED light option for a safer and more pleasant parking environment.
- Flexible installation on walls or ground-mounted with ground screws/spikes.
- Sustainable & eco-friendly, made from at least 75% recycled aluminium.
- 5-year warranty and a minimum expected lifespan of 20 years.

## Data sheet

Max number of charging outlets

Max number of simultaneous

charging sessions

Max incoming current

Max simultaneous charging power

Max charging power per outlet

Main fuse

Communication protocols

**Network connection** 

RF technology

**RFID type** 

**Current measurement** 

24V input for external breaker

Static load balancing (fixed value)

Dynamisk load balancing

Residual current device

Fuse

Battery backup (UPS)

Charging outlet type

54 per Smart Hub<sup>1</sup>

30 per SmartHub<sup>1</sup>

63A per SmartHub<sup>1</sup>

44kW

22kW (3-phase), 7.4kW (1-phase)

63A, B-characteristics

OCPP 1.6J/2.0.1, ISO15118-20 ready

Teltonika RUT 901 with 4G SIM card

Wifi (only for system configuration)

GSM, GPRS, EDGE, UMTS/HSPA+, LTE

ISO/IEC 14443 Type A, 13.56 MHz Mifare

MID certification expected in Q1 2026

Yes

Yes, Internet or locally (Modbus TCP/

RS-485)

Typ B per outlet (IEC 60947-2)

32A per ChargePod (IEC 60947-2)

Capacitor

Type 2, (IEC 62196-2)

Display

TFT 480x272px,

(HxW): 55 x 96 mm

Temperature range

operation

Material

-30°C to +45°C air temperature

Temperature range - non-operation

-30°C to +65°C non-condensing

Aluminium, at least 75% recycled (post-consumer scrap)

Color Graphite black (RAL 9011), powder

coated

IP54

IK10

EBR-lock "Stockholm" Lock

IP rating

**IK rating** 

LED Color temperature 4000K, Power 8

W/m, Luminous flux 1050 lm/m

Other Customizable display content

(logo, QR code, price per kWh, etc.)

RCD test with magnetic sensor

User interaction via QR code, RFID, NFC

Lockable charging outlets

<sup>1</sup> If more than 54 charging outlets additional SmartHubs can be

added.
